## About me

I was born on 7th November 1995 in Ljubljana. I went to primary school in Mislinja and secondary school in Velenje where I was studying in sports class. In 2014 I ended secondary school with matura examination. After that I've enrolled to Faculty of Social Sciences in Ljubljana where I studied Social Informatics. After a few months I dropped out because I have totally focused on ski jumping which I am practising since I was 5 years old. I achieved some good results but unfortunately I never made it to the highest level and that is the reason why I am thinking about ending my career. I have a lot of other objectives and goals I want to achieve in future, currently I am a student at B2 college, informatics engineering course and I also finished SmartNinja Web Development 1 course.

I am also very motivated to learn new things on my own. I am enrolled in multiple Udemy courses and I am interested in Web Development, Game Development, Game Design, Animation...

## Contact information
